
MIDAS (MDS) — Tokenomics (v1.0)

1. Total Supply

888,888 MDS (fixed)

Nominting. No inflation. Governance = scarce.

2. Allocation

Category	%	Tokens	Purpose
Staker Airdrop	60%	533,333	Reward loyal TROY stakers
DAO Treasury	20%	177,777	Grants, incentives, partnerships
Liquidity	20%	177,777	DEX pools for governance trading

3. Vesting Rules

A. Staker Airdrop

- 20% unlocked instantly
- 80% linear vest over 12 months

B. DAO Treasury

- Locked 12 months
- Unlock via DAO vote

- Max 5% monthly unlock

C. Liquidity Allocation

- 100% available for initial pools
 - LP tokens locked for 12–18 months
-

4. Governance Weighting

Voting power is based on:

- **Wallet balance**
- **Lockdurationmultiplier**
- **Stakingtiermultiplier**

Example:

Long-term lockers get **up to 3×** voting weight.

5. Economic Design

MDS is intentionally:

- **Low supply**
- **Highgovernance utility**
- **Lockedliquidity**
- **DAO-controlled treasury**

Demand is created through:

- Governance power
 - Validator access (future)
 - Vault access
 - Rewards
 - Ecosystem decisions
-
